

# Eleganza EZ

Universal hospital bed

# Eleganza EZ – solutions through innovation

- PRODUCT VALUE
- MODERN COLUMN CONSTRUCTION
- PATIENT SAFETY
- HOSPITAL INFECTION CONTROL

Eleganza EZ meets the challenging demands of the med-surg market while remaining affordable to today's constrained budget. It offers a back to basics approach that provides caregiver simplicity, patient safety and a low cost of ownership.

## PRODUCT VALUE

Standard features such as in-bed scale, bed exit and battery back-up meet the future acute care demands at today's budget.

## MODERN COLUMN CONSTRUCTION

Eleganza EZ has a patented, sealed aluminum column construction design that provides reliability and low cost of ownership for maintenance.

## PATIENT SAFETY

The Eleganza EZ bed brings a totally new siderail concept, a full-length split siderail design. This unique siderail design, bed exit alarm and low bed height improves patient safety.

## HOSPITAL INFECTION CONTROL

is aided by the easy to clean removable modular deck, sealed column design, and wound care therapy options.

- Eleganza EZ has patented aluminum columns which provide reliability and low cost of ownership for maintenance.

- The activation "GO" button protects against accidental adjustment and injury. Once pressed, the "GO" button activates the control for 3 minutes.

- Autoregression of the backrest significantly reduces tissue pressure in pelvic area and reduces patient movement.

- Easy to use bed controls allow the caregiver more time to deliver quality patient care.

- The full length split-siderail concept reduces potential patient entrapment and falls.

- Standard features such as in-bed scale, bed exit and battery back-up meet the future acute care demands at today's budget

- The 5th wheel combined with the light-weight frame improves bed mobility and reduces physical strain during transport.

- Eleganza EZ has a one button cardiac chair function that moves the patient from full recline to a clinically correct upright cardiac chair position.
